OBIMOBILE SOLUTION GIVES **INNOVATORS** A PLATFORM TO DEVELOP THEIR OWN MOBILE APPS WITHOUT THE NEED TO PROGRAM A SINGLE LINE OF CODE

ObiMobile Innovator Solution

"As a college student who does not know how to code in any programming language, I was surprised how easy it was to create my own Mobile App. All it took was some creative thinking on my part and the web-based tools from ObiMobile. If I can do it, everyone with a great idea for an App can do it."

- Miles C.
College Student

Building your own Mobile App with no Coding

Are you an Innovator with a great idea for a Mobile App but don't know how to code in Objective-C, Android, Java, or even HTML5? ObiMobile is your solution.

ObiMobile is a very simple easy to use tool that requires almost no technical expertise for

creating, publishing, and maintaining your Mobile Apps and Web Apps.

ObiMobile is a web-based tool that lets you develop your App on Windows, iOS, and even on Linux. You just need a Google Chrome browser and off you go.

How to be an #App Millionaire

As an app creator, you don't need financial backers, venture capitalists or even a publisher. Apple's App Store and Android's Market offer you the way to sell. The handsets in people's pockets provide the demand. All you have to do is provide the idea.

Getting the most out of your applications

Simplicity is key. ObiMobile is scalable and flexible.

To help Innovators create their Mobile App, ObiMobile provides the following key features:

- Ability to create Android, iPhone, iPad, and iTouch apps on a PC, Mac or Linux machine.
- Your App, your IP. ObiMobile does not take any rev-share nor licenses on your app. You develop it and it's yours. We'll even provide you the ZIP and APK file if you do not want us to publish it under ObiMobile.
- Robust mobile app features that should let you create semi-complex applications
- Support for multiple mobile devices such as iPhone, iPad, iTouch, Android phones, Android Tablets, and even the Amazon Kindle Fire
- and many more...
